Free Prizes At "Opening" Hudson's Bay Store Friday

LAC LA BICHE—Free corsages, balloons and door prizes will be given away this Friday, Sept. 5 at the "official opening" of the newly-redecorated Hudson's Bay Co. store here. Big reductions on most merchandise are being offered during the opening sale, reports Gene Martin, store manager.

Customers will be delighted at interior features such as new lighting, new display counters, frozen food areas and music-while-you shop.

Mr. Martin said the store has been undergoing alterations for the past two months, including a new tile floor. The heating system has been converted from coal to oil.

Customers will have music wherever they go in the store. Two loud speakers have been installed to relay recorded music provided by the store.

Mr. Martin said the interior walls are finished in blue, yellow, pink and green. The outside has been done in white and trimmed in green.

All store equipment is completely modern. New display counters in the grocery department are the latest type, having adjustable shelves. Modern counters, finished in roxatone, have been placed in the dry goods department.

The meat department has installed two new display counters. One is self-serve. There's a big walk-in storage cooler, too.

At 9 p.m. Friday, free corsages for the ladies and balloons for the kiddies, will be offered. Groceries to be given away during Friday and Saturday include 50 grocery hampers.

The main door prize of a mantel radio will be drawn Saturday night as well as other prizes.

Visiting dignitaries of the Hudson's Bay Co. who are scheduled to attend the opening are: W. J. Cobb, manager of western division, Edmonton; W. R. Palmer, merchandise manager of the fur trading dept., Winnipeg; J. Ziolkoski, inspector, and G. F. Ferrand, district manager, both of the Western Line District from Edmonton.

Mr. Martin, a member of the Lac la Biche Chamber of Commerce, has been store manager for seven years. Before that he served with "Bay" stores at Hazelton, B.C., Cold Lake and Goldfield, near Uranium City.

Families Meet After 18 Years Lapse

LAC LA BICHE—A happy reunion was held recently at the home of Mr. and Mrs. Mike Perron when all their family met together for the first time in 18 years.

Here for the occasion were Mr. and Mrs. Ray Perron and son Harvie of Port Angeles, Wash., Mr. and Mrs. Allan Parker and daughter Marie Anne of Vancouver, Mr. and Mrs. R. M. Clark and sons, Dennis and Billy, Edmonton, and Mr. and Mrs. Maurice Danes and family, Lac la Biche.

Parties Held

BREYNAT — A surprise birthday party was held in honor of Rose Roskewich recently. The party was enjoyed by some 55 friends who played games, danced and climaxed the evening with midnight lunch. Rose was the recipient of many pretty gifts.

A corn roast was held Aug. 24 for the young people, including Ivy Noonan and Violet Hilz, who are leaving for school or university. Those present enjoyed an evening spent in playing games.

A birthday party was held recently for Marlene Meyers. The guests spent a pleasant time with games, topped off by a birthday lunch prepared by the hostess.

FUA Pleased, But Disappointed

EDMONTON— "We are pleased that the government is at last giving some consideration to the Western Grain Grower" said A. W. Platt, president of the Farmers' Union of Alberta. This statement was made in response to a news report about grain subsidy issued by the Canadian Press from Ottawa. "We are also pleased that they are apparently giving special attention to the small farmer. He can stand all the help he can get," Mr. Platt said.

"However, we are disappointed that the government has departed from the principle of deficiency payments. This plan takes into consideration the prices received by farmers and the cost of production. We have no data as to how the figure of a dollar per acre was arrived at," Mr. Platt said.

The problem is that owing to conditions entirely beyond the farmers control the price at which he must sell his grain has been decreasing and the cost of production increasing. The purpose of deficiency payments was to make up to a minimum level this deficiency in income. If the government goes ahead with the proposed reported scheme, our objective will not be accomplished. The rates and maximum are too low.

We assume that is only a stop gap measure, and that the government will undoubtedly come up with other schemes, to bring to farm people a fair share of national income.

AFTER PUSHING the button to officially open the 80th Canadian National Exhibition, Prime Minister John Diefenbaker dispensed with formality and saw the sights of the big fair, with his wife, and Toronto Mayor Nathan Phillips, left. The Diefenbakers braved a thunderstorm to tour buildings and open the Hockey Hall of Fame. They wound up their day by seeing the grandstand show.

Venice

Jo Ann Giacobbo recently visited her sister, Doreen in Edmonton.

Lorina Lefebvre from Edmonton was recently visiting her parents for a weekend.

Mr. and Mrs. Rocco Giacobbo and family recently made a business trip to Edmonton.

Val Biollo from Edmonton was visiting relatives in the district.

Don Rowland was home for the long weekend after working with a telegraph gang.

Owl River

Mr. McFarland, former teacher in the Lac la Biche school division, is in charge of Owl River School No. 2 this term.

Due to the dry, hot summer, harvest started unusually early in this community.

Art Kediux of Lac la Biche baled hay for several farmers and ranchers in this district recently.

Peter Cardinal is working for Maxwell Diesel.

Smoky Lake Firm Gets Contract For $40,000 Sewerage Extension

At a recent meeting of Lac la Biche town council, the contract for an extension to the sewerage system of the town was let to Bert Construction Co., of Smoky Lake.

The new installation will provide sewer services to what is known as the old town. Work on the project is expected to begin this week and should be completed within 60 days.

The original undertaking, which involved an expenditure of around $50,000, was first put on the town's books early in 1957, but was rejected by the Board of Public Utilities Commissioners on the grounds that it called for the borrowing of a sum which would put the total borrowings of the town in excess of the limits set by the Town and Village Act. After some alterations to the plan, and much negotiating concerning the necessary financing, a loan was arranged with the Provincial Government, and with the firm of Associated Engineering Services Ltd. in charge of supervision, the work should be under way when this appears in print.

The contract calls for the building of a lift station in the southwest part of the town, where the new sewer mains will deposit waste which will be pumped through 1,240 feet of six-inch pressure line to a point on the existing sewer system, where it will flow by gravity to the town's disposal plant. Approximately 2,400 feet of eight-inch sewer mains are to be laid. It has not yet been definitely determined how many property owners will be connecting to the lines, but estimates run from 10 to 20 for the first year.

Bert Troyer, owner of the Construction Company, is well known in Lac la Biche, having had several smaller contracts with the town during the past few years. The total estimated expenditure of the complete project is expected to run in the neighborhood of $40,000.00.

$100,000 Suit Filed In Calgary

CALGARY — A Calgary mother of one-year-old twins is claiming more than $100,000 damages from the Calgary Hospitals Board and a Calgary psychiatrist for serious injuries allegedly suffered while undergoing shock treatment.

Co-defendant Dr. Morris Carnat has denied any suggestion that his treatment was negligent or improper. His statement of defence said the treatment he gave the woman was in accordance with the generally accepted standards of his profession, and was skilful and proper.

No statement of defence has yet been lodged by the Calgary Hospitals Board.

The statement of claim filed on behalf of Mrs. Helen Gehring of Calgary said she suffered multiple fractures of both hips while under shock treatment at Calgary General Hospital about March 6.

South Hylo

Mr. James McDonald Sr. attended a Metis conference in Edmonton Aug. 25.

Andy Guinand visited Edmonton on business.

Mr. and Mrs. John Madson spent the weekend at the home of Mr. and Mrs. H. Stratichuk.

The Teens Club enjoyed a social evening at the home of Mr. and Mrs. W. Sawchuk. Mrs. Helen Diachuk was co-hostess.

Robert McDonald and sister, Mary Jane, visited friends in St. Paul.

Alberta Liberals Will Deal With Revised Agricultural Policy Draft

EDMONTON—"An imaginative approach to the problems of agriculture" is urged in a revised agricultural policy drafted recently by Alberta Liberal Party M.L.A.'s for discussion and action at the Leadership Convention to be held here October 31 and November 1.

Based on the belief that the family sized farm unit is still the mainstay of agriculture in the province, the draft says "Liberal Policy is designed primarily to make rural life more secure and, also, to make it more attractive through the provision of modern services and utilities.

"To achieve this we advocate an imaginative approach to the problems of Agriculture and the re-organization of the Department in order that it may give better service and guidance to the farmers.

"Specifically, Liberal Policies would be designed to:

Develop a comprehensive system of agricultural credit at low interest rates co-ordinated with existing Federal plans to cover the *whole field* of farm operations, such as land, livestock, and improvements including farm homes.

Give more aid to rural areas in acquiring modern utilities including telephones and natural gas by means of planned development and interest-free loans as now provided

(Cont. on Page Two)

AURORA THEATRE

Lac la Biche — Alberta

PRESENTS

Shows at 8:30 Mon. thru' Fri.

Alberta Liberals Will Deal With Revised Agricultural Policy Draft

(Continued from Page One)

for Power Co-operatives in areas of scattered settlement.

Co-operate with the Federal Government in developing a satisfactory system of crop insurance.

Expand and improve District Agriculturist services and give more aid to municipalities for agricultural service board activities.

Make much better use of our agricultural school facilities by transferring them to the Department of Education with the addition of Trade and Vocational Training courses. As much agricultural training should be provided as there is demand for and *practical* courses be available for those farm boys and girls who have a genuine interest in agriculture or household economics, but lack the academic ability to carry on through high school.

PROMOTE USES

Promote the best possible use of our agricultural resources by the following means:

All phases of water control to be co-ordinated under one department including water for power, irrigation, domestic and industrial use. Irrigation to be developed strictly in accordance with need, including range stock watering. Present waste and extravagance in government controlled projects must be eliminated.

In recognition of the serious threats of soil erosion and loss of fertility a provincially assisted system of seed distribution designed to greatly increase the use of grass and other forage crops would be part of an overall program for better land use.

Co-operate with the P.F.R.A. in the development of a community pasture system along the lines so successful in Manitoba and Saskatchewan.

Develop an over-all plan to cope with possibility of very serious feed shortage which, with present great increase in cattle population, could occur with even one year's general drought.

Make an impartial technical survey as a first step in trying to arrive at a solution for the present bitter controversy between stockmen and sportsmen over grazing in the Forest Reserves.

REV. NICOLAS STETZENKO

New Pastor For Lac La Biche

Rev. Nicolas Stetzenko on Aug. 1 became the pastor of the district of Lac la Biche to which he had been posted July 20.

Father Stetzenko was born on March 12, 1926, in Poltava, Ukraine, where, after completing intermediate school he entered the army academy from which he graduated with honors. During war time he participated as instructor at the army academy of the Ukrainian National Army. He arrived in Canada in 1947 and first worked with Brampton Pulp and Paper Co., later moving to Sudbury, Ont., where he completed trade school.

During this time he took part in church and community activities, taught Sunday school, worked with young people and sang in the church choir.

In the spring of 1954, after receiving his citizenship papers, he entered St. Andrew's College in Winnipeg, the seminary of the Ukrainian Greek Orthodox church in Canada. After four years of study in theology he was ordained deacon April 10, 1958., graduated and received his licentiate in theology May 1, and was ordained into the order of priest June 1 of the same year by Dr. Ilarion, Metropolitan of the Ukrainian Orthodox Church in Canada.

He married the former Miss Josephine Halajko in May, 1957, in Winnipeg.

Spruce Valley

Eddie Zilinski was a recent patient in the Royal Alexandra hospital in Edmonton after eye surgery.

Bill Mahaden, Russel and Lily, who are employed in Edmonton, spent the weekend at their home here.

Mr. and Mrs. P. Koltowski were weekend visitors at their farm in this district. They report that some one broke into their farm house while they were away. Nothing of value is missing although some damage was done.

Mr. and Mrs. Emil Zilinski of Edmonton spent a few days at their farm here. Lorna and Eddie Zilinski accompanied them back to Edmonton.

Mrs. Budz and Mr. Berezuik Sr. are home after major surgery in an Edmonton hospital.

Mr. Baudrau, electrician from Boyle, has finished wiring Nick Zilinski's new house for electricity.

A farewell party was held at the Willow Flat hall Aug. 23 to honor George Wojtowicz who is leaving the district to attend school in the United States. He completed his Grade 12 in the Grassland school during last school term.

Grace Homeniuk, employed at Spirit River, visited at his parents' home here recently.

Mr. and Mrs. William Duban and sons of Lac la Biche spent several days at their farm. While here they did some swathing.

Mr. and Mrs. Mike Chomiak and family of Edmonton were weekend visitors at their farm here.

Sitting in front of a 35 or 50 H.P. motor is a wonderful form of summer fun. But remember, hot-rodding on the water is just as dangerous as it is on the highway Play safe for more fun afoat.

Scott-Atwater
"FLYING SCOTT"
Smallest, lightest, huskiest "high-horse" outboard ever built!

In one great forward step, Scott-Atwater engineers have taken the 3-cylinder design proved in high-performance European engines, and applied it to the new Flying Scott—with dramatic results.

This bold, years-ahead design brings you a simple, compact powerhead only slightly larger than a 35 h.p. engine yet so remarkably efficient that it produces a full 60 horsepower!

And you get much more than pure power alone with the far-advanced Flying Scott. The 3-cylinder in-line design, with a firing impulse each 120 degrees of crankshaft revolution, is inherently balanced.

Alberta Grade 11 Students Rate High In Special U.S. Tests

Alberta grade 11 students "stack up very well" against the typical Grade 11 student in the United States on the basis of National Merit Scholarship examinations written experimentally by 72 Edmonton students.

Education Minister Aalborg said Tuesday the results of the tests, written in April, are "very encouraging."

Of the Edmonton pupils, 26 were in the upper two per cent of the 479,000 who wrote them, and 64 were in the upper 10 per cent. All were in the top 23 per cent.

In mathematics, 21 students received marks as good, or better, than the top one per cent of the average American class.

TYPICAL STUDENTS

Mr. Aalborg said the Americans tested represented typical grade 11 students. The Edmonton students were selected by principals from five high schools, who were "directed only to make a quick selection of some of the better Grade 11 students for testing."

The tests will be used in the U.S. to select the better students, who will be asked to align another examination to select 10,000 "finalists" to be considered for $5,000,000 in scholarship awards.

FOR COMPARISON

The Edmonton students will not be competing for the scholarships. The provincial department of education says it was asked by the administrators of the test to write them on an experimental basis, to enable comparison of Alberta's top students with those in the U.S.

The students were selected from Strathcona Composite, Ross Sheppard, Victoria Composite and Eastglen high schools. The Edmonton Public School Board approved the experiment.

The tests, which took three hours altogether were of the objective type and students do not prepare especially for them. The five tests covered such areas as English usage, vocabulary, mathematics, social studies and science.

Sarrail

Mr. and Mrs. Felix Hewko and Mrs. Anna Hewko attended the funeral of Mrs. Fedorah Aug. 29 at Andrew.

Miss Joyce Hewko is home after being employed at Lamont for the summer months.

Visitors to the home of Mr. and Mrs. Andrew Hewko were Mrs. Eva Rozak and Peter, Mrs. Mary Kuzik.

The country has plenty of five-cent cigars, but they are selling for 12 cents.

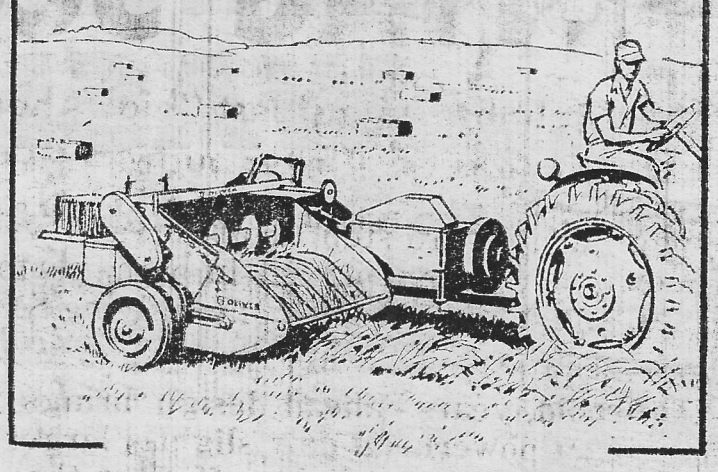
OLIVER 60-T and 60-W
Twine-Tie and Wire-Tie
BALERS
All-Around Tonnage Champs
with "Pivot-Balanced" Drive



Match a new Oliver—twine-tie or wire-tie—with any other machine in your small, rough, patch-pattern fields. There's where it gobbles up the windrows, bales up to ten tons per hour as easily as on the straightaway.

You get Oliver's exclusive "pivot-balanced" drive ...and exceptionally short coupling. Just follow the windrow with the rear tractor wheel—even around the sharpest corner. Your Oliver gets the hay... saves hours of time when time counts most.

Here are balers with everything: new, leaf-saving pickup...swinging drawbar for safe transport... overrunning clutch (extra)...protective devices for all important units. You can adjust bale length in seconds—from 12 to 50 inches. Twine- and wire-tying units are easy to interchange, and an engine (extra) is easy to mount when desired.

CHAS. LEBAS
Says . . .
"IF A BIRD IN THE HAND IS WORTH TWO IN THE BUSH— HOW MUCH IS A FULL STORAGE TANK WORTH IN A BUSY SEASON?"

Now is a good time to have that storage tank full of Imperial Tractor Fuels. Then you'll be able to go full steam ahead when you start to get busy.

If you don't have a storage tank . . . see someone who has. He'll tell you it's a fast, safe and convenient way of storing and handling gasoline. He'll tell you, too, that getting a storage tank was one of the smartest moves he ever made. And when you get your tank, it'll be a smart move to get it filled with Imperial Tractor Fuel.

Decompression Suit Big Aid In Childbirth

JOHANNESBURG — A plastic decompression suit is being used at Witwatersrand. University to speed up labor and minimize the pain of childbirth.

Research workers say decompression lessens pain and benefits the child because of shortened labor and less strain.

Experiments in this direction began when researchers observed the effects of a curare-lie drug on the mother. Later experiments showed that reduction of atmospheric pressure would facilitate labor. By the end of 1955 these scientists managed to construct a small decompression chamber for the expectant mother.

The doctors found this reduced the number of contractions required in the first stage of childbirth. In the decompression suit, the expectant mother operates a valve which activates a pump and reduces the atmospheric pressure on her abdomen.

Scientists explained that the abdomen enlarges under decompression. This enlargement relieves muscular pressure on the spine and abdomen, thus minimizing pain.

An analysis of cases where the pressure suit was used showed most required less than five hours for the first stage of labor.

In some cases the first stage lasted eight hours and in some even 10 hours, but there was every indication that these would have been prolonged first stages taking upward of 30 hours or more in ordinary circumstances.

Plan Talks On Hospital Scheme

Hospital officials throughout Alberta will be consulted this fall before the federal-provincial hospital scheme is tightened against abuse.

The only qualification for coverage in Alberta is Alberta residence, and officials plan a closer scrutiny of residence claims. Some false claims have been made for Alberta coverage, but no action yet has been taken on them.

J. D. Campbell, director of the province's hospitals division, said Monday he hopes tests for eligibility can be devised "as soon as possible," but that Alberta hospital officials will be consulted first. He said the health department wants to know the extent of the abuse, how it occurs, and where problem areas are.

$2 DAILY FEE

An Edmonton resident is eligible for coverage on payment of a $2 daily fee while receiving hospital care. The fee varies from centre to centre. At Edmonton's Royal Alexandra Hospital, a non-resident of Alberta is charged $16.25 daily for standard ward care.

The hospital scheme was inaugurated last July 1, with the federal and provincial treasuries each bearing about half the cost.

Officials seek simple, inexpensive tests for eligibility claims, noting a complex system with an administrative staff probably would cost more to operate than it would save through reduction of abuses.

Advertising makes any good business larger.

Money is pretty expensive when it gets scarce.

House Approves Pipeline Bill

OTTAWA — The Commons Tuesday gave final approval to a bill authorizing extension across Canada of an Imperial Oil pipeline franchise.

The franchise, held by Imperial's wholly - owned subsidiary Stanmount Pipe Line Company, now covers Saskatchewan, Manitoba and Ontario.

CCF House Leader Hazen Argue, continuing the attack maintained by his party through all stages of the bill, said the measure merely gives additional strength to Imperial Oil, which he described as an international cartel.

Art Smith (PC—Calgary South) said Mr. Argue was a "little unkind" to Imperial Oil. The company, after all, was one that had spent millions of dollars seeking oil in Alberta before the successful strike at Leduc, which marked the beginning of the boom in that province.

Mr. Smith, formerly associated with Calgary oil interests, said the company employs Canadians "almost throughout." Its leaders were "good citizens" who had helped bring Canada's oil industry to its present peak.

Venice

Patients at the St. Catherine's hospital recently were Salvador Giacobbo, Nick Torresan and Brian Macor.

Mona Lefebvre of Westlock is spending a three - week holiday with her parents here.

Miss Lucy Giacobbo of Edmonton was a weekend visitor at her mother's home.

Peter Diachuk was in Edmonton on business recently.

Mr. and Mrs. Joe Bonifacio and children have moved back to their farm in this district.

Some people we know are a crowd in themselves.

Fairbanks-Morse

GAINADAY WASHER

The washer with the "Automagic" rinse cover that eliminates hand rinsing.

Available in decorator colors and in white

The Fairbanks - Morse "Automagic" rinse, an exclusive Fairbanks - Morse feature, is standard on this model FM-D24. The "Automagic" rinse is produced by the use of a special "Automagic" spray-rinse cover. Rinsing is simple, effective — eliminates hand rinsing completely, reduces wringings to just one and eliminates the necessity of rinse tubs and hot rinse water.

After the clothes are washed in the normal manner, the "Automagic" rinse hose is connected to the cold water tap to spray in clean water while the wash water is being pumped out. The water level can be checked through the view circle in the cover and can be adjusted by regulating the water flow at the tap. The complete rinsing operation takes 6 to 10 minutes.

Get the model today in blue, green, pink, yellow, and pure white

DONALD FLEMING

Deadline For Bond Exchange, Sept. 15

Local residents who have yet to convert their Victory Bonds were reminded this week that deadline day is just around the corner.

Finance Minister Donald Fleming, reported in a special address that more than three-quarters of the Victory's have already been exchanged for Canada Conversion Loan bonds and said he hoped no one would miss out on this "unprecedented opportunity".

He added efforts were being redoubled in the few days left before Sept. 15 to bring the opportunity to the attention of anyone still owning Victory Bonds here and in other cities, towns and villages across the country.

Part of the minister's remarks were aimed at bondholders who may have felt that their own holdings of Victory Bonds were too small to be worth converting. He stressed that regardless of size—$5 or $500, or $5000—it is to the owner's advantage to exchange his old bonds for new ones yielding a higher return and in addition receive a cash adjustment.

He said, too, that some Canadians may not realize they own Victory's, and suggested that everyone holding government bonds of any description check the serial numbers. If any number begins with "Z7", "L9", "P3", "P5", or "P7, it means that bond is a Victory.

The Finance Minister said that the conversion total achieved to date meant that the loan was already a tremendous success, and pointed out that it represented an accomplishment in government financing unmatched in scale by any other country in the western world.

He added a note of special interest to small communities throughout the nation, by emphasizing that the loan would help remove market uncertainties arising out of the imminence of large Victory Loan maturities and to that extent assist in the planning of development projects by municipalities.

Wandering River

Mr. and Mrs. Nick Strayski and Victor and Betty recently made a trip to Athabasca for dental treatment.

Mr. and Mrs. Armand Dupre and son Robert have moved to Fort Smith.

A corn and wiener roast was recently enjoyed by all the district teenagers. It was held for all those who are leaving the district shortly to obtain work or attend school.

An afternoon tea was recently held at the home of Mrs. Lillian Karpetz in honor of Miss Ivy Noonan and Miss Violet Hilz who will both be leaving the district shortly.

If you drink and drive you are not only thoughtless but selfish.

Soldier Killed When Car Overturns

Pte. John Emery Martin, 27, of 10527 80 St., stationed in Edmonton with the Canadian Army, was killed when his car went out of control and swerved, bounced over a concrete centre strip and landed on its top. Mrs. Martin, 24, a passenger in the car suffered bruises and shock.

Police said the car was going south and went into a long skid sideways near the 102 Ave. overpass. While it weaved out of control, the young woman was hurled out onto the pavement. Then the car bounced over the high concrete separation, flipped into the air and landed on its roof in the north-bound traffic lane.

The soldier was found pinned under the hood of his over-turned car & was pulled free by spectators. Traffic jammed the area and police and ambulance crews had difficulty. The soldier was dead on arrival at hospital.

For three hours the Groat Road was blocked off because of the scattered wreckage and damage to power lines. A pole fell across the traffic lanes. Police diverted traffic at 107 Ave. and near the Groat Bridge until investigations were completed.

Special Air Tour To Hawaii Arranged For Alberta Farmers

"A tropical trip with a purpose". That is how Weekly Newspaper Publisher T. W. Pue describes a proposed air tour to the Hawaiian Islands. Invited to join in will be Alberta farmers, members of their families and anyone specially interested in the science of agriculture.

This includes farm implement dealers, farm supply agents and agriculturists.

Special arrangements are being made by Mr. Pue with the Government of Hawaii for the group to inspect and study agricultural operations. This will give Alberta men and women an opportunity to see "how it's done" in tropical countries.

Tour members will meet government officials including the Governor of the Territory. Full details of the proposed tour will be published in next week's issue of this paper.

Managers Wanted

Male or Female, Full or Part Time

$300.00 minimum monthly income guaranteed for spending only a few hours weekly in just spare time, more full time. Canadian company has immediate openings for ambitious men or women to manage local business. No experience necessary as we train you in all phases of the business and no high pressure men are wanted as no selling on your part is required.

YOU MUST:—

—Be of good character and able to furnish references.
—Be able to devote 8 to 10 hours weekly to business.
—Be able to make a cash deposit of $1,600.00, which is refundable.

If you can meet these qualifications and desire an interview with Company Executive in your area, answer this advertisement immediately.

This is one of those unique and rare opportunities that will probably avail itself to you once in a lifetime.

For a personal interview in your area, send us along a letter with a complete resume and include personal references and your phone number.

Write to: Department P-100, 106 Adelaide St. W., Toronto, Ontario.

THE Homemaker

By EDITH WHITNEY

Any homemaker will be proud of the jelly she makes if it is clear and sparkling, if it has a fresh, fruit-like flavor and if it is stiff enough to hold its shape when taken from the glass. If your jelly doesn't meet these standards, the problem may be caused by:

Tough Jelly—Too small quantity of sugar; boiling too long; too much pectin.

Sugar Crystals—An excess of sugar, overcooking, too great delay in sealing. In grape jelly, cream of tartar crystals may be greatly reduced if not prevented entirely by letting the juice stand for several hours in a cold place before making it into jelly.

Weeping—Occurs in jellies from cranberries, currants, and other fruits that are high in acid. Be sure these fruits are not underripe.

Cloudiness—May result from impartial straining. Re-strain juice you wish to make into clear jelly and do not press juice out of fruit mass. You may make a second extraction from the fruit mass, squeeze out the juice and make into jelly for such uses as jellyroll, etc. where appearance is not important.

Failure to Jell—Is caused by an improper balance of pectin, sugar, acid and mineral salts. The fruits used may have lacked pectin or acid or both. Over cooking may have destroyed so much pectin that a gummy mass was formed instead of a jelly. Undercooking will also result in failure to get a jelly formation, because of insufficient concentration. Too much water may have been used for the extraction. Juice may be reboiled and commercial pectins added to bring about gelation.

Goose Lake

Mr. and Mrs. Elmer Elm from Nebraska, Homer and Ethel Elm and Mr. and Mrs. Clarence Elm of Hardisty were guests of Mr. and Mrs. George Parker.

Miss Joan Tillapaugh, employed in Edmonton, is holidaying at home with her parents, Mr. and Mrs. Clyde Tillapaugh.

Herbert Erickson has gone to Winnipeg to attend a shoot.

Miss Lynda Bergheim is back home after a trip to Banff, Jasper and Edmonton.

Net profit from the dance held at Rich Lake, sponsored by the W.A., was $73.18.

Mrs. Ville Kinnenun was a recent patient in the St. Catherine's hospital in Lac la Biche.

The W. A. meeting was held at the home of Mrs. S. Kinnenun.

Plamondon

Dale Bosse of Red Deer is visiting at the home of Mr. and Mrs. Evangelist Cote.

Philip Cadieux left recently to work at Fort Smith.

Mrs. Richard LaBonti is working at the Co-op store while Alec Schaub is on holidays.

Mrs. Alfred St. Jean is employed at the Plamondon Mercantile.

R. E. Piquette was a patient in St. Catherine's hospital for a few days.

Mr. Art Varin is also a patient in St. Catherine's hospital.

Miss Dolores St. Jean spent a few days here with her parents on her return from summer school at the University of Alberta. She is now at Beaumont where she is on the teaching staff.

Miss Cecile Gervaise has returned from Mallaig and will again be joining the Plamondon teaching staff.

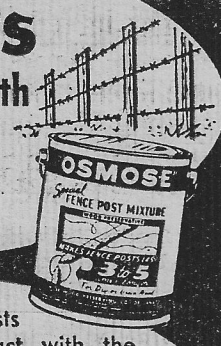
Mrs. Phil Johnson, Maureen and Marilyn spent a week in Edmonton.

Mr. Lucien Maynard, Q.C. and Mr. R. Saks, Q.C. were here on a business trip recently.

ORIGIN OF LOGARITHMS

Today logarithms are so widely used that we are apt to take them for granted. According to the Book of Knowledge, this system of calculating was devised by John Napier, Scottish mathematician, as far back as 1614.

FENCE POSTS
last 3 to 5 times longer with "OSMOSE SPECIAL FENCE POST MIXTURE"



You can make your fence posts —in fact, any wood in contact with the ground or water, last 3 to 5 times longer by using "Osmose Special Fence Post Mixture". Simply applied like paint to the groundline of the post, "Osmose" preserves any kind of wood, dry or green, costs only 5¢ per post and makes them last 3 to 5 times longer.

MICHAEL HAMAR CO. LTD.
LAC LA BICHE Alberta

MAKE WOOD LAST 3 to 5 times longer with "PENTOX"
Primer-Sealer Wood Preserver

You can make any exterior wood —doors, sashes, porches, fences, garden furniture, wharves—last 3 to 5 times longer with "Pentox". Brushed on easily like ordinary sealers, "Pentox" preserves wood against moisture and rot with a synthetic resin and powerful wood preservative. Economical "Pentox" costs less than the prime coat of paint it saves. Meets C.S.A. specs.

NEW FOR 1958!
A CASTER-WHEEL MOWER
Even Better Than the Famous No. 5

- EASY-ON, EASY-OFF JOHN DEERE NO. 8 FEATURES HIGH-CAPACITY CUTTING... PROTECTED OPERATION... EXTREME FLEXIBILITY

Here's the caster-wheel mower that's setting new highs in mowing efficiency—the John Deere No. 8. Combining the rugged strength and clean design of the famous John Deere No. 5 with a remarkably high cutting capacity, the No. 8 mows an amazing *35 or more acres* per day! It features a longer pitman stroke, increasing the sickle stroke by 3/4 of an inch for higher cutting speeds at reduced flywheel rpm. This makes possible cleaner cutting at higher forward speeds.

The No. 8 works with any tractor—it's easy-on, easy-off . . . takes one man less than five minutes to attach or detach. See us soon for complete information.

97 Graduate From R.T.T.P. Awards Presented At Banquet

EDMONTON—The R.C.A.F.'s Reserve Tradesmen Training Plan summer camp ended August 28 after instructing 161 youthful auxiliary airmen and airwomen in the skills of many R.C.A.F. groundcrew trades, for the past two months.

Of the 135 students attending the technical courses for the first summer, 97 graduated. Of these, six intend to enlist in the RCAF regular force while 57 will transfer immediately to the Auxiliary component of the RCAF in Edmonton. The others, although they do not intend to continue training with the RCAF in the immediate future, could perform worthwhile duties in the RCAF in the event of hostilities.

Several awards were presented to graduating airmen at a banquet Wednesday evening. Trophies, donated by the parent unit—3054 Technical Training Unit (Auxiliary)—were given to trainees obtaining the highest standard in their respective trades, as follows: Aeroengine technician AC2 R. W. Stewart, 11730-127 St.; Airframe technician AC2 L. B. Thompson, 12737-65 St.; Electrical technician AC2 L. A. Sandy, Dawson Creek, B.C.; Instrument technician AC2 J. E. Tucker, 11902-93 St.; Supply technician AC2 J. E. Reid, 11727-115 Ave.; Clerk typist Airwoman 2nd class E. M. Blain, 10952-150 St.

Cash awards of $20 were presented to the airwoman and airman with the best airmanship record for their second year of training—Airwoman 1st class V. A. Ginther, 14019-124 Ave., and LAC E. Eichenlaub, 15935-Stony Plain Road—while $15 awards went to Airwoman 2nd class D .E. Johnson, 10259-157 St., and AC1 W. N. Boddy, 10342-114 St. for obtaining the highest airmanship standards during their first year at RTTP. 'Airmanship' includes behavior, appearance and dress, and citizenship qualities. These cash awards are donated by the wives of RCAF Auxiliary officers of 18 Wing (Auxiliary) and its components such as 418 'City of Edmonton' Squadron in Edmonton.

Wing Commander J. G. Portlock, Technical Services Officer for 18 Wing made the presentations.

Noral

Mrs. Catherine Wolansky and children from New Westminster, B.C., were guests for 10 days at the home of the Woychuk family.

Miss Annie Anderson, employed in Edmonton, spent the long weekend at her home.

Robert Hansen is back on the farm after working in Prince George.

Mr. and Mrs. Donald Gordey were guests of the former's parents, Mr. and Mrs. George A. Gordey, over the weekend.

E. W. Grove visited his home a few days recently. Mr. Grove is roadmaster for the N.A. Railway from Lac la Biche to Waterways.

Hail, last Thursday, destroyed 62 per cent of Metro Woychuk's crop.

Frains

Mrs. T. Sawchuk has been visiting in the district recently. Mr. and Mrs. Sawchuk were residents here before they moved to British Columbia.

Spending the Labor Day weekend at their homes were Nadia Kowalyk, Mary and Olga Broda, Raymond Manchur, Rae Kolack, Mr. and Mrs. W. Kashuba, John Hussynec, Alexandra Kachur, Mr. and Mrs. P. Greschuk and Johnny Pfau.

Otto Pfau is back in the district after working in Edmonton for a couple of months.

Smilin' Charlie and Hank Andrew Arken, of Edmonton were visitors in the district recently.

Visitors at the Kolach home recently were Mr. and Mrs. B. Evanowich, Cheryl and Allen, of Edmonton; Mrs. O. Kopra and Larry, of Hollow Lake, Mrs. J. Romanyshyn and family, Mr. P. Letwin of Edmonton, and Mr. and Mrs. N. Letwin of Weasel Creek.

Paul Yurkiw of Edmonton was in the district recently.

Visiting and harvesting on their farm were Mr. and Mrs. W. Nahorney, Donnie and Albert, of Edmonton.

Billy Shyian is back home after a two-week holiday at the home of Mr. and Mrs. C. Trach of Lac la Biche.

Mr. and Mrs. J. Shyian, Betsy and Stella, made a trip to Lac la Biche recently.

Berny

Narcisse and Paul Menard have left for Fort Smith, B.C., where they have obtained employment.

Alcide Menard is employed on the Omer Duperron farm.

Ulric Menard, Euclide Menard and Louis Lemay motored to Edmonton recently.

Recent visitors in Berny were Mr. and Mrs. Laurier Plamondon and family and Mr. and Mrs. Edmond Duperron and family from Edmonton.

A farewell party was held at the home of Mr. and Mrs. Leo Bourassa in honor of Mr. and Mrs. William Gauthier and family from Fort Smith. Mr. and Mrs. Gauthier have been visiting relatives in the district during the past month.

A man with an axe to grind ought to turn his own grindstone.

Sarrail

Visitors in the district were Carl Shevoley, Mrs. M. Inagerson and Grace.

Mrs. Felix Hewko is back on the farm after a visit with her family in Andrew.

Mr. and Mrs. Wally Rekovetsky are guests of Mr. and Mrs. Nick Hewko after a year's absence in Yellowknife.

Rich Lake

Fork Lake was again open for commercial fishing Aug. 25-26.

Visiting their brother, Mr. Gust Kumpula, are Mr. and Mrs. Jake Watters and Mrs. Mary Watkins, all of St. Helens, Ore.

Louise Hogetveit is visiting at the Max Stevens home.

Mr. and Mrs. Dennis Skakum of Edmonton are visiting relatives here.

You're lucky if you own a high-speed outboard runabout. But remember that the canoe, rowboat and sailboat have equal rights on Canada's waterways. Slow down when passing other boats or docks where boats are moored. Play safe for more fun afloat.

SHERWIN-WILLIAMS EXTERIOR HOUSE PAINT FOR MAXIMUM COLOR RETENTION!

With SWP House Paint, you don't have to be afraid of reds turning brown, greens turning blue, yellows fading to cream. SWP colors are formulated, controlled and tested to give sparkling, clear colors that stay color-true longer.

Mr. and Mrs. Laverne Blais and children of Surrey, B.C., were guests last week at the home of Mrs. Blais' parents, Mr. and Mrs. Ed. Cadieux. Before returning to their home the Blais' expected to visit Mr. and Mrs. David Cadieux at Lacombe and Mr. and Mrs. Ed Klinginburg of Olds.

Mrs. A. Varze and family moved to Edmonton last week. Mrs. Varze and son, Roger, have both accepted positions on the staff of St. Luke's Separate School.

Alex Pruden, who has been a patient in the University Hospital, following a car accident two years ago, was home for a few days recently. Though still confined to a wheelchair, he is making slow but steady improvement.

Jane Burdek and Vickie Sorochan will leave Sept. 6 for St. John, Que., where they will enter the R.C.A.F. for a three-year term. The girls are looking forward to their chosen career, and their many friends join in wishing them success and happiness.

Mrs. Glen Brown of Rocky Mountain House is spending a couple of weeks at the home of her parents, Mr. and Mrs. Louis Rudiger.

C. W. McFarland recently spent a couple of weeks renewing acquaintances with old friends in the Lacombe and Clive areas.

Mr. and Mrs. John Onefruw and Ronnie enjoyed a motor trip to the West Coast. They visited relatives at Victoria, New Westminster, Vancouver, Haney and Penticton, as well as taking in the sites at Calgary, Banff, Radium Hot Springs and points in the United States. A high light of their trip was seeing Princess Margaret during her visit to Victoria.

Miss Carole Coutney visited with her sister, Mrs. G. Steinman during the summer holidays.

Miss Iris Duban left Wednesday for Calgary where she will be teaching at the Sacred Heart School.

Mr. and Mrs. William Feniak and daughters Valarie and Colleen, have been transferred from the R.C.A.F. station at Claresholm to Trenton, Ont. They left by car for their new home. Enroute they visited friends in Minneapolis and Chicago, and Mrs. Feniak's brother Romeo in Toronto. Mrs. Feniak is the eldest daughter of Mr. and Mrs. Frank Coutney.

CORRECTION—In the list of the Little Egg Lake Bible Camp counsellors, the name of David Harrison of Three Hills should have been in the place of David Johnson.

After careful consideration we have concluded that these paragraphs could be written much better by almost anybody.

Soroka-Fischer Vows Exhanged

A pretty wedding took place at Holy Trinity church at Grassland when Miss Dorothy Marlene Fischer, daughter of Mr. and Mrs. Harry Fischer, became the bride of Mr. William Soroka, son of Mr. and Mrs. Nick Soroka. Rev. B. A. Hart of Boyle officiated at the ceremoney.

The bride chose a floor-length gown of net and lace with a low draped neckline and short sleeves, with matching gloves. Her fingertip veil was held in place by a crown trimmed with sequins and she carried a bouquet of red roses and rosebuds tied with white tulle.

Bridesmaids Miss Olga Holdis and Miss Irene Johnson wore identical semi-formal, blue silk dresses and feather hats, and carried bouquets of yellow roses.

Attending the groom were Mr. Cecil Fischer, brother of the bride and Mr. Duncan Kingsbury.

For her son's wedding, Mrs. Soroka chose a blue dress of net over taffeta with white accessories and wore pink and white sweetheart roses en corsage.

A reception for 70 guests was held in the Grand Union Hotel, Athabasca. The bride's table was centred with a three-tiered wedding cake beautifully decorated with white roses and blue doves. Toast to the bride was proposed by Mr. Hart.

Later in the evening, a dance, attended by a large number of persons was held in the Grassland community hall.

For their honeymoon the young couple visited Vancouver Island and returned through Washington and Idaho to their home at Taylor, B.C.

Adele Lamoureux, Paul Piquette Exchange Vows

Ste. Cecile's Roman Catholic church, Normandeau, was the setting for the wedding recently of Miss Adele Lamoureux, daughter of Mr. and Mrs. Omer Lamoureux of Normandeau and Mr. Paul Piquette, son of Mr. and Mrs. Roland Piquette of Plamondon.

The double-ring ceremony was performed by Rev. Clement Chataigny, O.M.I., of Beaver Lake, followed by the nuptial mass. The wedding march was played by Mrs. Octave Chevigny.

Given in marriage by her father, the bride was charming in a floor-length gown of Chantilly lace with satin trim. Her chapel veil was held in place by a crown of rhinestones. She carried a bouquet of white roses and her only jewelry was a pearl necklace and earrings, gift of the groom.

Bridesmaids Miss Lucille Tremblay of Edmonton and Miss Marie Richard wore waltz-length gowns of blue and mauve, respectively.

Groom's attendants were Mr. Albert Lamoureux and Mr. Andre Piquette.

A reception for some 125 guests was held at the home of the bride's parents. Among those present was Rev. Alcide Ricard of Plamondon.

After a honeymon at Elk Island Park the young couple are making their home near Plamondon.

Gourin

Gail Bourassa has returned home from St. Catherine's Hospital. A patient in the hospital is Lucien Ulliac.

Mrs. Lucine Charest and daughter were recent guests at the home of Mrs. Charest's parents.

Atmore

Mr. and Mrs. R. Matheson have had as guests Mr. Matheson's sister and brother-in-law and their family of Nova Scotia.

Mr. and Mrs. Larry Shank and family are preparing to move to Plamondon where trey will make their home.

Joyce and Herbie Schwitzer of Lac la Biche were recent guests at the William Campbell home.

Mr. and Mrs. Nick Kostiuk and family moved into their new home last week.

Reecnt visitors at the Lloyd Dakin home were Miss Dorothy Walters and Ross Dakin of Edmonton.

A successful dance was held in the Atmore community hall Aug. 16.

Mrs. Stanchfield was a recent visitor in this district.

Latest Crop Report Shows Alberta Crop Yield Better Than Expected

Alberta's harvest yield this year will be greater than was expected before harvesting began, the provincial agriculture department's ninth crop report says. The upward revision of the estimated yield is based on returns from crops already threshed.

"While crops matured rapidly, reducing the size of the kernels, the quality of wheat and most of the barley threshed so far is good." Indications are, however, the oats will weigh in light per bushel.

In southeastern Alberta about 60 per cent of the wheat and barley, 30 per cent of the oats and some flaxseed have been threshed.

WELL ADVANCED

Harvesting is well advanced for this time of year in other parts of the province, but varies greatly between districts.

In the Edmonton area, the amount of wheat threshed varies from none to 40 per cent in various districts, oats from none to 25 per cent, and barley from none to 60 per cent.

In the western fringe from Cardston to White Court, harvesting operations "are only well started."

The southern Alberta sugar beet crop is promising, a good pea crop has been harvested, and corn processing is in full swing.

Yields from mustard, saf-flower and sunflower are expected to be good, while rapeseed yields over the province will vary from good to very poor, the report says.

ALFALFA GOOD

Good yields of alfalfa seed and alsike seed are anticipated, but prospects are uncertain for red clover seed.

Honey production is expected to come close to last year's 6,500,000 pounds.

Pastures are poor in north and central Alberta, and vary from good to fair in southern Alberta. In most areas, the amount of feed appears to be enough to carry stock through a normal winter, but reports continue to be received of late yields of coarse grains being cut for feed.

The report says binders are being used more than for some time in harvesting operations, in some instances to avoid laying swath on light stubble. Whatever the reason, the report says, "feed conservation will be one of the benefits obtained."

INFORMATION WANTED NOW

The Sun Publishing Co. Ltd. would like to have information on the present whereabouts of Charles Alley. Mr. Alley has been selling subscriptions to the Company's newspapers. It would be appreciated if anyone knowing his present address would please telephone collect 393938, Edmonton.

Hooke Charges "No Co-operation" On Victory Bonds

RED DEER — The Hon. A. J. Hooke, minister of municipal affairs in Alberta, said that the Alberta government's new five year program was not dreamed up in five minutes before the Conservative convention but is the product of three years planning.

Speaking at the Social Credit nominating convention, Mr. Hooke charged that the federal government showed a complete lack of co-operation with the Alberta government in the conversion bond drive were also made by Mr. Hooke. "The provincial government had to exchange Victory Bonds for the new conversion bonds through chartered banks and couldn't use the treasury branches for the transaction.

The chartered banks thus collected the commission, which I understand is already $160,000. If the conversion had been made through the treasury branches, this money would have gone to the people of the province," he added.

Mr. Hooke criticized the new conversion bond issue as a benefit to large financial institutions and added "the people will have to pay high interest rates."

He challenged a member of the House of Commons to ask how many of the bonds exchanged for the new issue were owned by large financial institutions."

The municipal affairs minister described the new five-year program as one to counter "a recession of which signs can be seen on all sides," he said.

Rural Power Loans $31,811 For Month

Loans totalling $31,811 have been made under the Alberta Rural Electrification Revolving Fund Act. They include; Barich Rural Electrification Association Ltd., $16,848; Lanfine Rural Electrification Association Ltd., $6,500; Martins Rural Electrification Association Ltd., $5,603, and Bindloss Rural Electrification Association Ltd., $2,860.

Name Socred 1960 Candidate

RED DEER, Alta.—William Ure of Delburne, brother of the late Agriculture Minister David Ure, has been named Social Credit candidate for Red Deer in the provincial election expected in 1960.

Mr. Ure's brother held the seat before he died in a motor accident. Present incumbent is Progressive Conservative W. J. C. Kirby of Red Deer.

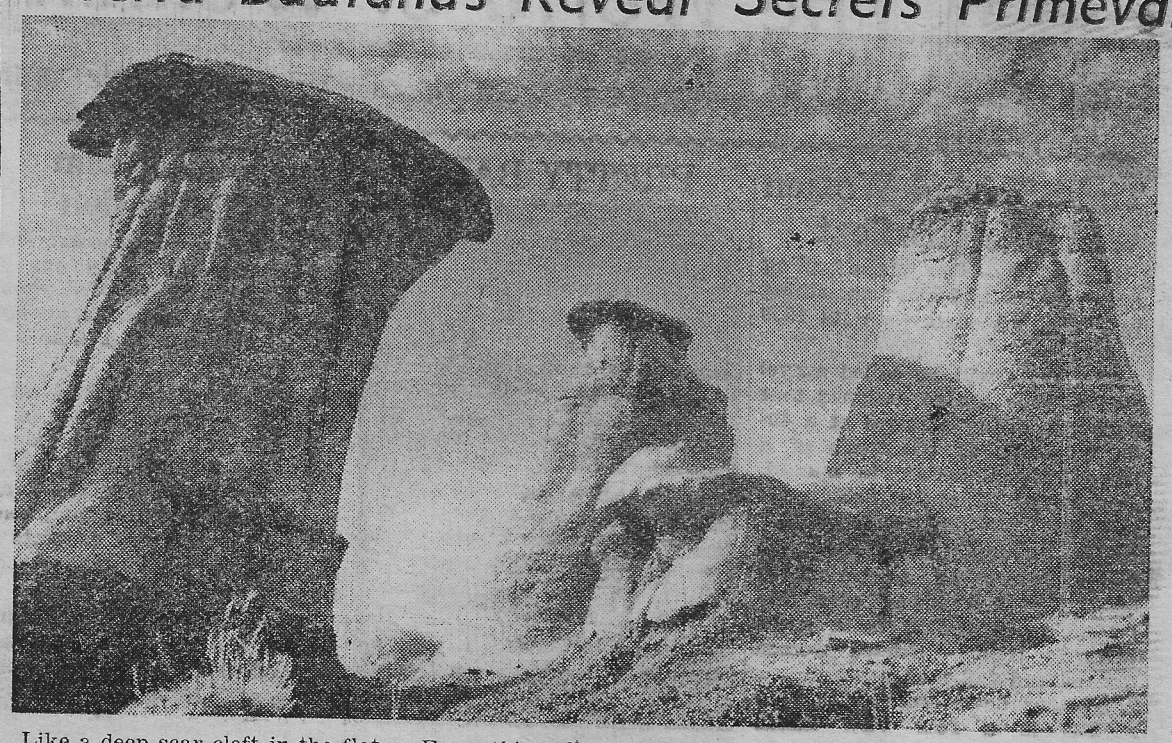
He was nominated at a Socred rally in Red Deer attended by 60 persons. Hon. A. J. Hooke, Minister of Municipal Affairs, said the province will probably be faced with an election next year and Social Credit is aware it will face a stiff battle.

Mr. Hooke indicated more elaborate announcements "some of them which stagger the imagination as the last announcement did," will be made from time to time.

Mr. Hooke said his department already has plans drafted for a master plan to provide autonomy within the municipal districts of the province.

He said the elaborate projects slated for the next five years will "be paid for with spot cash and not one cent will be borrowed."

Alberta Badlands Reveal Secrets Primeval



Like a deep scar cleft in the flat prairie country of southeastern Alberta is the Red Deer Valley Badlands area. The Badlands stretch from a point near Three Hills almost to the Saskatchewan border. An astonishing array of plant and animal life, both living and long extinct, is contained in its 300-odd square miles. Weird topography lends a definite note of fascination.

From this valley came the most complete remains of the Dinosaurian age known in the world today. Since exploitation began in 1912 more than 30 complete skeletons of primeval fauna have been unearthed as prize museum pieces. Petrified and fossilized remains of this mysterious age are strewn over the valley floor. Some specimens hang partly exposed along the crumbling hillsides. At one point remains of a petrified forest is visible, with gigantic tree stumps embedded in coal seams.

Visitors have taken away countless souvenirs such as pieces of petrified bone and trees. The practice is still allowed, but no digging is permitted, nor are articulated skeletons allowed to be touched.

Some living remnants of the semi-tropical forms of life which flourished in this part of the country millions of years ago are still in evidence. Here, too, is where the semi-tropical yucca plant grows. An interesting characteristic of this growth is that plants are propagated only through fertilization by the Yucca moth.

Ravages of time have created a weird splendor in topography. The valley presents a turbulent maze of dolomites, buttes and other foundations, "hoodoos." Some of these eroded formations are 120 feet in height.

Edmonton Fall Show For Sheep And Swine Set For October 28 - 31

Dates for the 1958 Edmonton fall show and sale of purebred and commercial sheep and swine have been set from October 28 to the 31.

Officials expect to draw some of the finest breeding stock and commercial animals in Alberta for this show which will be held in the exhibition sales pavilion.

Mr. F. N. Miller, assistant manager of the exhibition indicated that the prize lists will be in the mail shortly and those not receiving a copy should contact the exhibition office.

Six major breeds of sheep to be featured this year will be Suffolk, Oxford, Border Cheviots, North Country Cheviots, Hampshire and Southdown. Swine exhibits will be made up of Yorkshire, Tamworth and Landrace breeds. Both males and females of each breed will be offered for sale with many of the females being bred at the time of sale.

This years purebred show as in the past is designed to give the farmers an excellent opportunity to see the top animals in the various breeds on exhibit and it serves as a pool from which farmers can buy at public auction the breeding stock of their choice. As a precaution and to protect the buyer all purebred animals are veterinary inspected and graded to assist and guide the farmer in making their selection of quality animals.

A highlight of the four days will again be the junior section of the show. This policy for the exhibition which was established back in 1907 concerning classes for boys and girls will again be implemented. Juniors will have the opportunity of competing in lamb trimming contests and sheep and swine judging competitions.

Commercial sheep and swine will also be sold by public auction. A special carcass competition which has proved very popular will be continued again this year.

The World of Women

A PAGE OF INTEREST TO WOMEN, edited by MURIEL McGREGOR

Tight-Skirted Women Will Like This Seat

DETROIT — One of the leading auto makers will offer something new in front seats with its 1959 line.

The seats will be called swivel units. They are so designed that they will swing outward at a 40-degree angle at the touch of a lever after the door is opened. Pressure on the cushion returns it to normal position.

The manufacturer says the device offers an invitation to back into the lower cars. He adds that it should be a great boon to tight - skirted women drivers and tall men.

Another device coming in 1959 models is a rear view inside mirror that automatically tips to a non-glare level when bright headlights strike it through the rear window.

Creamed honey results from natural and quick granulation which produces very fine crystals of a creamy-like constistency. It is classified as creamed honey or finely crystalline honey of creamy consistency and is in great demand.

Let's Eat

BY

IDA BAILEY ALLEN

Whether they are grown in home gardens or on farms and rushed to market under refrigeration, an appetizing procession of summer vegetables is en route to our tables.

"Different vegetables selected for color contrast, varying texture and flavors," suggested the Chef, "can be featured at lunch, or co-ordinated importantly with the entree at dinner."

"Or even served for breakfast," I said. "This is still done in some farm homes. It makes a nice change from bacon and eggs. Luncheons based on vegetables can be a treat, also.

"For instance—creamy tomato juice cocktail, new potatoes cooked with garden peas, corn kernel fritters, caraway rye bread, cottage cheese with strawberries and beverage of choice.

TOMORROW'S OVEN-DINNER

Tomato Aspic
Had dock au Gratin
Whipped Potatoes
Baked Onions and Green Beans
Tossed Mixed Salad
Coffee Gel with
Whipped Topping
Hot or Iced Coffee or Tea
Milk

Haddock au Gratin: Poach 2 lbs. fresh or frozen haddock fillets in salted water to half-cover, containing 1 tsp. salt, 1 bay leaf and ½ tbsp. lemon juice.

When flaky, cool and divide into bite-sized flakes.

Meantime, prepare 2 c. white sauce. Add 1 tsp. lemon juice, 1 tbsp. mayonnaise and 3 coarse-chopped hard - cooked eggs. With a fork, stir into the haddock.

Transfer to an oiled 3-pt. shallow baking dish. Cover with ½ c. each fine dry white bread crumbs and grated cheese mixed with ¼ tsp. powerded thyme and 2 tbsp. melted butter or margarine.

Bake 25 min., or until browned and well-heated in a moderate oven, 375 degrees F.

Trick of The Chef

Combine 2 parts well-seasoned mashed potato, ¼ tsp. nutmeg and 1 part mashed cooked carrots. Beat until light.

PRETTY BABY

THIS PICTURE records a red-letter incident in Kenneth's life. Six months old, he is sitting alone for the first time. Kenneth David is the son of Mr. and Mrs. David Ewoniuk of Hairy Hill and grandson of Mr. and Mrs. Frank Gushaty of Willingdon.

(The editor will pay $1 for a suitable picture of your pretty baby. Send it, with details, to Edmonton Sun, 10815-82nd Ave., Edmonton).

A Touch Of Black For Smart Decor

CHICAGO — A room without a touch of black is comparable to a woman without eye-brows. So says Ruth Mauerman, president of the Illinois Institute of Decorators.

"A room always needs a touch of black to punctuate it," she said.

The decorator debunks the theory that every room needs a touch of red. "Avoid red unless it really fits, complements, or matches," she said. "Just one bit of red can ruin a carefully co-ordinated room."

Miss Mauerman's decorating philosophy includes staying away from what she called the ordinary colors, such as navy, maroon and dark brown. She feels that the more subtle the color, the more exciting and useful it is in the home.

She also tries to avoid over use of the neutrals such as beige or "greige," which is a combination of gray and beige.

"You can make a color like that do too much," she said.

Gems Of Thought

TRUTH

Receiving a new truth is adding a new sense.

—Justus Liebig

Beg no question, shrink from no conclusion, but follow truth wherever it may lead.

—Henry George

Every truth has practical consequences, and these are the test of Truth.

—William James

A man must be stupid who believes there is no truth but on his own side.

—Joseph Addison

We must not let go manifest truths because we cannot answer all questions about them.

—Jeremy Collier

NEW TWIST FOR SLAW

The test kitchen of the Western Growers' Association offers this variation on cole slaw: add celery seed and cooked shrimp to finely shredded green cabbage. Toss with your favorite dressing.

Children's Vision Needs Attention

School commencement should set us thinking about our children's eyesight. We have attended to his clothes, his books, his bodily health, his teeth, but what about his eyes?

Since more than 80% of all school activities are based on vision, a child's whole development is very closely associated with his ability to see clearly, comfortably and correctly. His safety, too, is related to quick and accurate seeing, accidents can happen because of poor vision.

Here are some of the symptoms which, the Canadian Association of Optometrists says, may indicate a vision problem.

Avoiding close work.

Losing place while reading or using finger as a pointer to keep place.

Holding reading closer than approximately 13-16 inches.

Excessive head movements while reading.

Frowning, excessive blinking, scowling, squinting or other facial distortions while reading.

Tilting head to one side.

Tending to rub eyes.

Thrusting head forward.

Tension during close work.

Body rigidity while looking at distant objects.

Other symptoms are: headaches, frequent styes, watering or bloodshot eyes, and nausea when associated with the use of the eyes, e.g. car sickness.

With the aid of modern science practically all children can see clearly, comfortably and correctly. Make an eye examination part of your child's preparation for back to school.

Fashions

By GRACE THORNCLIFFE

Here is a frock designed specifically to achieve the casual look that young figures like for summer vacation wear. It is an elongated shirt dress cut on classic lines but subscribing to the chemise. To soften the effect a self-belt can be worn. Fabric is cotton in oversize pastel blocks.

$1 for Favorite Recipes

(The editor will pay $1.00 for recipes printed in this column each week. Address all letters to Women's Editor, The SUN, South Edmonton).

Home-made Coffee Essence

½ lb. coffee
1½ pt. boiling water
½ lb. sugar

Place coffee in a jug and pour boiling water over it. Stir well, then cover the jug with a small saucer and stand it in a pan of boiling water. (The water should come three parts up the outside of the jug.)

Continue boiling for one hour, strain carefully and stir in the sugar. Simmer until the mixture becomes syrupy, then pour into bottles with tight-fitting corks.

Serve by placing 1 teaspoonful in a small cup and adding boiling milk, water or equal quantities of each. Use also as a flavoring for desserts or fresh fruit. A little is delicious with ice cream or custard.

B. G.
Tawatinaw, Alta.

Lines From Linda

To repair dents in furniture, dampen the affected part. Fold a piece of brown paper several times, soak it in warm water and put it on the dent. Then apply a warm, not hot, iron until the moisture evaporates. Repeat until the dents disappear.

Brass-plated door knobs and lock plates often lose part of the plating. Remove them from the doors and add a coat of smooth, durable enamel to harmonize or contrast with the door color.

If glasses stick together, immerse the bottom glass in hot water and pour cold water into the top glass.

A little lemon juice added to water in which rice is cooked will keep the grains separated. It will not add a tart flavor.

Vary scrambled eggs with herbed crabmeat. Add diced cooked crabmeat to eggs. Crumble whole basil leaves over the mixture and add a pinch of garlic powder. Serve over hot buttered toasted English muffins.

Nutmeats will stay whole if the nuts are soaked overnight in salt water before cracking.

Perk up stewed prunes by adding apples, lemon or orange slices, cloves or stick cinnamon.

To keep left-over ham from drying out, cut off some fat and fry it. Let it harden and spread it on the cut end about an inch thick before refrigerating. When ready to slice the ham again, scrape off the fat.

Wanted: A Little More Care

Of the hundreds of accidental deaths that occur annually in Canada, many could be prevented by the exercise of common sense Many traffic and fire fatalities, accidental poisonings, and deaths from preventable diseases could be avoided if preventive care were taken, especially to protect children against their own venturesome actions. Precautions in the storage of dangerous substance around the home and against fire would save lives and prevent the loss of property.

Eternal Truth is changing the universe.

Mary Baker Eddy

Half-Size Wardrobe

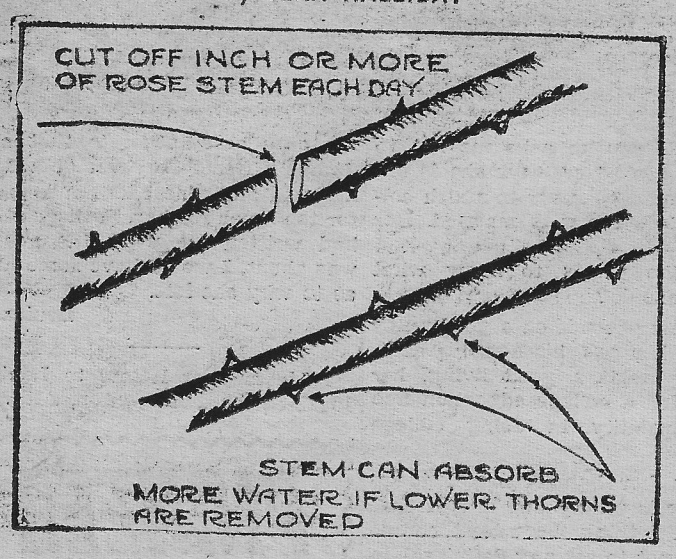
Wife Preservers

SPRINKLE A RUG with salt before you vacuum it. The salt helps sweep out the soot, brightening the rug.

Garden Graph

By DEAN HALLIDAY



LONGER LIFE FOR CUT ROSES

A daily shortening of the stems will help to keep cut roses fresh. Cut off an inch or more or the stems each day, as shown in the accompanying Garden-Graph. This will prolong the life of the flowers by providing a fresh water-absorbing surface on each rose stalk. Use a sharp knife, and make a slanting cut while holding the stem under water.

If a flower is extra large and top heavy on a long, weak stem, slit the bottom end of the stem for several inches. This will enable the flower to absorb more water.

Breaking or cutting off the lower thorns on a rose stalk, as shown in the Garden-Graph, also makes it possible for the stem to absorb more water and thus prolong the life and freshness of the flower.

Clean, cold water is the best medium for keeping cut blooms. Removing them to a cool room or cellar overnight will add to their keeping qualities.

Water in vases or other containers should be changed often; once a day is not too much.

Several commercial products are available which are useful in prolonging the life of many cut blooms. When used, it is essential that directions on the package be followed exactly.

$1 FOR Bright Sayings

The Editor will pay $1.00 for each child's saying printed. To quality, item must be true, personal remarks of a child known to the writer. Address: "Bright Sayings," 10815 - 82 Ave., Edmonton, Alberta.

One day my little sister and I went to the barn to feed the cows. One cow was bending on her front legs trying to get some hay from the other cow. As soon as my little sister saw that she cried out, "Oh, look, the cow is saying her prayers!"

A. M. C.

St. Albert.

My sister, 4, wanted our mother to come downstairs and phone for her, but mother said she was too busy. Later, the doorbell rang and, when mother came downstairs and opened the door, there stood Sis, who smiled and said, "Mommy, now that you're downstairs, would you please phone grandma for me?"

M. C.

Green Thumb Corner

A perennial garden is perhaps the most satisfying of all to the flower enthusiast. With careful planning the blooming season can be much more prolonged than with annuals.

Where this season was a first year for the perennial border much remains to be done to give it an established look. September and October are the planting months for many perennials but the soil should be prepared now.

Bulbs such as crocuses, tulips, daffodils and scillas will be planted this fall. Study bulb catalogues for colors and blooming time to assure a perfect combination.

Bearded iris, which will flower in June, should be moved in September, and such plants as the day lily should be transplanted then. For later flowering perennials, delphiniums and peonies will give wonderful results and must be moved in the fall too.

A few free flowering annuals, such as the petunia and marigold, planted next spring in bare spots will bring color throughout a much longer period.

Expect little and you will spare yourself disappointments.

By FRANCES DELL

Inside shutters are a popular decorating note. They can be used in any room in the house from living room to bath.

One of the most effective uses for inside shutters is as a divider between different rooms or areas where a wall is not desirable. Picture them between a living room and a dining room. They will be pushed back against the wall almost all of the time. In this position they lend an attractive tropical or early American look, depending on decoration of the room. Comes the time for a dinner party they can be closed completely, until it is time to serve.

Inside shutters are often used as cabinet doors in the kitchen bathroom or anywhere else you may choose. They make attractive substitutes for curtains. They have the advantage of being permanent and only need cleaning or a coat of paint to be as good as new.

Shutters can be fashioned into attractive portable folding screens. One millwork company has on the market inside shutters that go up and down and built right into the window frame. These are perfect used with the new cafe curtains.

Study your house or your house plans. You will probably find several spots that can be made more attractive and functional with inside shutters.

186 Alberta Kiddies Get Tablets

Penicillin tablets have been distributed by the provincial health department to 186 Alberta children who show symptoms of having rheumatic fever, Health Minister Dr. J. Donovan Ross, said.

This is part of a program announced by Dr. Ross at the last session of the legislature to check the effects of rheumatic fever on children's hearts.

The disease, to which children below their teens are particularly susceptible, does not necessarily involve heart damage but a weakened heart is a common result.

Dr. Ross said it is expected 400 to 500 children will receive the free tablets. It is hoped the tablets will prevent or curtail heart attacks, particularly recurring attacks, in the youngsters.

A hard task is eased by the application of immediate energy.

It is possible to eat your way to loneliness and better health. If you are nervous, fretful, and nothing goes right, you need vitamin C. Your complexion may be sallow, lines tend to form before they should, blemishes are a problem, all you may need is more vitamin B in your diet.

If you tire easily, for no particular reason, you will probably feel better if you increase your intake of vitamin D.

Some food authorities say that the best foods containing the most vitamins to give you the greatest beauty are those foods that are eaten in their natural state.

Today many of us are forced to live our daily lives under considerable stress and tension. It may not be possible for us to eliminate the cause of stress and tension from our lives but we can learn to live with these conditions so that they will do as little harm to our bodies as possible.

Under stress some vitamins are destroyed or their value diverted. Of all the vitamins, Vitamin C has been more completely investigated with regard to possible effects of stress. For this reason it has been recommended that liberal amounts of fresh fruit or fruit juices be included in the diet of those living with tension.

The inclusion of a good all-round vitamin tablet in your daily diet is wise.

A MATTER OF PUNCTUATION

Here is an amazing statement which the Book of Knowledge quotes in its article on punctuation "The old man entered the room on his head, a battered felt hat on his nose, old-fashioned spectacles on his feet, dusty shoes in his lapel, a wilted flower in his teeth, a briar pipe in his market bag, a dozen oranges in his hand; he held an old newspaper and he read it with great interest". Shift the punctuation marks and you will have a quite ordinary statement of fact.

There are individuals in every community who care little for the respect of the people if they can get 100 per cent.

sort of society that puts all women to work for the greater glory of the state, to the great detriment of the family unit. But we do feel that those who have the qualifications for a professional life—and who want to or must work anyway—should not be hampered by the sort of musty and prejudiced traditions that Dean Coutts condemns.

Table Top Workbench Easy To Build

Since even the smallest household repair usually requires a vise, clamp or a place to hammer, this ingenious easy to build, table top workbench, is a big help. Its unique design permits fastening to a kitchen table or counter top. Through a clever arrangement of dowel pegs which are inserted in top of workbench, even wide boards can be clamped securely in position.

The full size pattern offered below simplifies building with hand tools. All materials required are stock-size and readily available at lumber yards. Step-by-step directions, plus full-size patterns so simplify construction, anyone can build this project in a minimum of time.

Regardless of whether you live in an apartment or house, this handy bench will prove a big help. If you want Junior to take an interest in woodworking, build one for him. It will not only encourage his use of tools but also save the furniture.

Send 55c in coin or money order (no stamps please) for Table-top Workbench, Pattern No. 573. Send 55c additional for 64 page catalog illustrating over 300 build it yourself projects to: Carpentry Dept., Edmonton Sun, 280 Maitland St., London, Ont.

Parentage Problems Solved In Cattle

MONTREAL — An American scientist says the determination of parentage through blood tests can be done with far greater accuracy in cattle than on human beings.

Professors Clyde Stormont of the University of California, Davis, Calif., Friday told the 10th International Congress of Genetics that this is largely because the composition of cattle blood is much more complex than that of humans.

Because of this complexity it has been found possible to determine which of a number of bulls sired a particular calf in 95 per cent of the parentage problems.

"In man, scientists are lucky if they can solve 50 per cent of the parentage problems through similar tests."

BLOOD GROUPS

Professor Stormont said much progress has been made in the last five years in determining blood groups of cattle and chickens. He added there has been much pressure on geneticists to do this work because it is believed a knowledge of the blood groups would have an extremely useful application in breeding.

Work in this field is also being done at the Ontario Agricultural College in Guelph, Ont. The only other places on the North American continent where this research is being carried out are the universities of California, Wisconsin and Wyoming.

Scientists are hopeful the information they gain from blood group studies will enable them to predict which cross breeds will produce the best results.

He added that a knowledge of blood groups of chickens have provided the key to hatchability averages.

AUSSIE WHEAT EXPORTS

Exports of Australian wheat and flour in the past 12 months are estimated at approximately 62 million bushels, compared with 126 million in the previous 12 month period. This reduction of about 50 percent is mainly the result of the drouth which cut production last season.

A reader, who asks me not to publish her letter, says she is engaged but she wants to finish college before she gets married. Her boy friend wants to get married now. She wants to know what should she do?

Well, it depends on a good many things; her age, his age, his ability to provide a good living, her desire for a college education and her capability in doing college work.

From her handwriting I judge that she is very young and, if that is true, I think her wisest course will be not to set any definite date for a wedding for sometime.

Louisa.

Another reader writes that his wife died almost a year ago and left him with eight children, one a baby.

He needed a wife to take care of his home so he courted a widow who had four children living with her. After a short engagement they were married but she left him after five days.

He says that he loves her and wants her to come back but she wants a divorce. Five of his children are living with him. He says there is a lot of gossip going around about why she left and he doesn't know what to do.

As he did not tell me of any incident that caused the lady to leave, my only assumption is that she probably found the task of a new husband and nine children to care for too much for her. Perhaps if he had written me what the gossip was about, I would have some idea as to why she left.

Louisa.

PHOTOGRAPHED against the back-drop of Montreal's famous Jacques Cartier bridge is CBC singer Mimi Catudal and orchestra leader Rusty Davis who are featured in a CBC summer radio show Ca, c'est Montreal. Broadcast each Saturday over the Trans-Canada network, Ca, c'est Montreal is a smooth mixture of French and English songs, sung by Mimi to the accompaniment of music by Rusty and his 25-piece orchestra.

Coal Output Drops Again

Coal production in Alberta for the first seven months of this year totalled 1,072,074 tons, which is 480,141 tons short of the output a year ago, according to a report issued by J. A. Dutton, director of mines for the provincial government.

The mines yielded 74,039 tons in July, compared with 91,714 tons in the same months last year.

In the bituminous fields, Crowsnest dropped from 35,346 to 28,153 tons last month. Coalspur produced 9,223 tons, compared with 13,619 tons a year ago.

In the sub-bituminous areas, Castor rose from 4,240 to 9,691 tons in July. On the other hand, Drumheller dropped from 17,078 to 11,475 tons and Edmonton from 1,004 to 744 tons.

65 Phone Co-Ops Formed In Year

There are now 914 mutual telephone companies associated with the Alberta Government Telephones in Alberta, and 46 more are in the process of being formed AGT officials reported.

During the past year 65 new mutuals have been formed and 22 of them took advantage of the provincial government's $500,000 revolving loan fund established last year to help the voluntary co-operatives with building lines and making repairs.

Officials said the average loan is about $1,500.

Interest in the mutuals is found particularly in areas already served by electricity, AGT officials said.

SEALED TENDERS addressed to the undersigned and endorsed "Tenders for Research Piggery, Experimental Farm, Brandon, Man." will be received in the office of the Secretary, until 3:00 p.m. (E.D.S.T.), Wednesday, October 1, 1958.

Plans and specification can be seen and forms of tender obtained at the offices of the Chief Architect, Department of Public Works, Ottawa, Ontario, the District Architect, 705 Commercial Building, 169 Notre Dame Avenue East, Winnipeg, Man., and the Post Office at Brandon, Manitoba.

To be considered each tender must be accompanied by a security in the form of a certified cheque or bonds as specified in the forms of tender and made on the printed forms supplied by the Department and in accordance with the conditions set forth therein.

The Department, through the Chief Architect's office, or through the undersigned, or through the office of the District Architect at Winnipeg, Man., will supply blueprints and specification of the work.

The lowest or any tender not necessarily accepted.

ROBERT FORTIER,
Chief of Administrative Services, and Secretary.

Department of Public Works,
Ottawa, August 25, 1958.

THE LIQUOR LICENSING ACT

Application For Hotel Beer Licence

Public notice is hereby given that the undersigned intends to apply to The Alberta Liquor Control Board for a Licence to sell Beer by the glass or open bottle, for consumption on the licensed portion of the premises, and also to sell Beer by the unopened bottle for consumption elsewhere than on the licensed premises, in conformity with the provisions of The Liquor Licensing Act and the Regulations made thereunder, with respect to the following described premises:

Beer Salesroom on the ground floor of the Pelican Hotel, situated on Lots 1, 3 and 5, in Block 8, Plan No. 2759 H.W., Plamondon, Alberta.

Dated at Plamondon, Alberta, this 14th day of August, 1958.

PELICAN HOTEL CO., LTD.
APPLICANT.

Robert E. Piquette, President.
Lucien Maynard, Secretary.

Any person wishing to protest against the issuance of a Beer Licence to the applicant should notify the Alberta Liquor Control Board, Edmonton, Alberta, in writing, within thirty days of the date shown at the foot of this advertisement.

Optimism is more important to business than cash is to buyers.

Housing Starts Show Increase

OTTAWA — Housing starts in Canadian centres of 5,000 or more population rose to 12,057 in July from 9,387 in the corresponding month last year, Central Mortgage and Housing Corporation reported.

Starts in the first seven months of 1958 increased to 65,095 from 41,075 a year previous.

Completions in July advanced to 7,136 from 6,594 and in the seven-month period to 50,483 from 42,543.

U.I.C. Replies To Workers' Problems

In this column we publish questions about unemployment insurance and employment together with answers received from the Unemployment Insurance Commission.

Q. In the case of *regular* benefit the amount of benefit is based on the average of the last 30 weekly contributions made in the 104 weeks prior to date of claim. What is the amount of benefit based on in the case of *seasonal* benefit when there may have been only 15 (the minimum) weekly contributions in all?

A. In this case, the rate of seasonal benefit is based on the average rate of the contribution weeks since the end of the previous March.

Potato Inspectors Check Ring Rot

Fifteen provincial inspectors will be busy walking up and down a lot of potato rows this month.

Around 9,500 acres of commercial potatoes will be covered by these men who are experienced in quickly detecting Bacterial Ring Rot. They must work fast as their's is a race against the unpredictable frost which makes a slight infection of vines difficult to detect.

All commercial fields in the major potato growing areas of Edmonton, Calgary, Drumheller, Brooks and Lethbridge will be checked, advises J. B. Gurba, Supervisor of Crop Protection, Alberta Department of Agriculture.

When potatoes are infected with Ring Rot, which is a bacterial disease causing a soft rot, their keeping quality is impaired and markets are limited. Consequently growers must be sure that any infected potatoes are disposed of early to safeguard their industry.

The Alberta Department of Agriculture provides this inspection service to maintain high quality on commercial acreages. Any commercial growers without permits are urged to contact their local District Agriculturist or the Field Crops Branch for free inspection service.

WELD
Those worn and broken parts
with a Welder from:
Mechanics' Supply Co. Ltd.
10234 - 103 St., Edmonton
Lincoln AC-180 Power Line Welders. Prices from $205 up. Harris Oxy-Propane and Oxy-Acetylene Torches. Complete Gas Welding and Cutting Outfit, $135.00.

BUSINESS OPPORTUNITIES

SERVICE STATION AND GARAGE
in town close to Edmonton. This exceptionally good business does a real nice turnover. Building also has separate five-room home. Propane heated. Fully modern. After several years of fine operation owner must sell and will consider a reasonable down payment. Full price, including large stock, approximately $45,000.00. Will accept trade as part payment.

LUNCH COUNTER
in one of the best Alberta points. Located on Highway 16. All traffic must go past this business place. Owner enjoys a tremendous turnover. Unfortunate circumstances force him to sell. Building is rented and a long lease is assured. Living accommodation also available if required. Fixtures are priced right at $12,900 with a down payment of only $6,000 required. For further information on either of these businesses phone 47221 or write—

600,000 Albertans Receive Salk Polio Vaccine Shots

Nearly half the population of Alberta is now fully protected by Salk vaccine against polio, Hon. Dr. J. Donovan Ross, provincial healtt minister said.

An estimated 600,000 in the province have now received the full compliment of three doses of the vaccine, and 75,000 more are partially protected, still requiring additional doses.

Dr. Ross said a large percentage of those protected are school children, with nearly all school children in the province now having had all three shots.

Last week a program to immunize 100,000 Alberta civil servants was started.

The provincial health department has budgeted $90,000 this year for polio vaccine, with the federal government providing about the same amount.

The vaccine is available free to persons up to 40 years of age.

There have been 10 cases of paralytic polio reported in Alberta to date this year, compared with 32 during the same period last year.

Pearson Pledges Liberal Crusade

SPENCERVILLE, Ont. — Liberal leader Lester B. Pearson said he will lead national crusade this fall to re-organize the Liberal party for an attempt to overthrow the Conservative government in 1962.

Mr. Pearson told a convention which selected Mayor Mark Salmon of Prescott as party standard bearer in the Sept. 29 federal by-election in Grenville-Dunas riding he intends to build a young party, a party of reform with responsibility and a desire to serve Canada.

Universities Get Aid Boost

OTTAWA — The government has decided to boost federal grants to Canadian universities by 50 per cent says Minister Donald Fleming.

The grants, paid to the universities through the National Conference of Canadian Universities, will be increased to $1.50 per capita of population of the province in which the university receiving the aid is situated. The original payment, established by the then Liberal Government in March 1957, was $1 per capita.

The minister said that the increase will mean an additional 8.5 million dollars for the universities this year. Total federal grants in the 1958-59 fiscal year will now be 25.6 million dollars, he said.

Fleming said that the additional funds would be covered in a further supplementary estimate to be put before parliament shortly.

Both opposition parties welcomed the announcement.

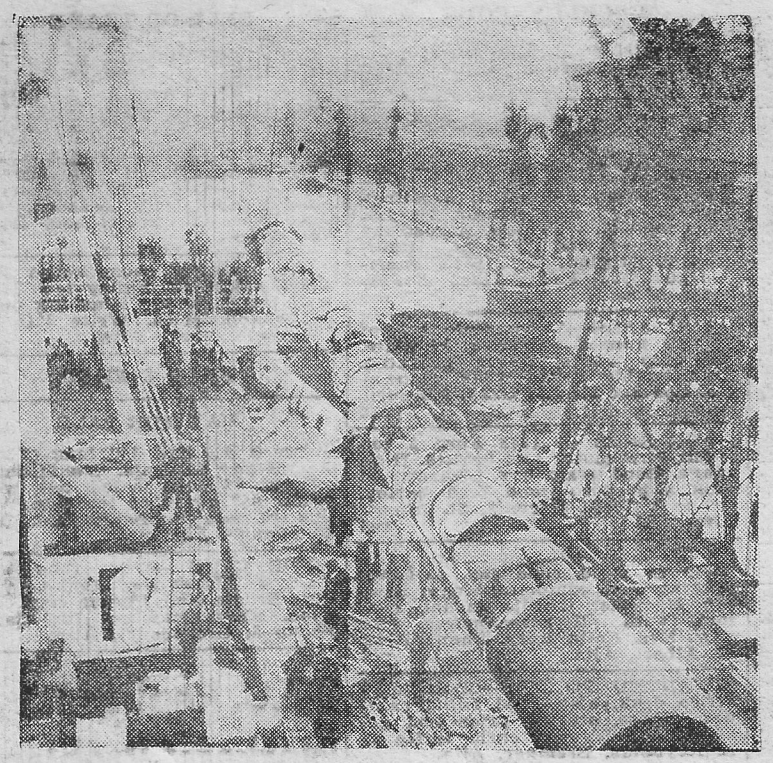
Even Sheep Become Thin On Top

LETHBRIDGE — Sheep begin to grow thin on top after their fifth year, a seven-year study of three breeds of sheep on a Lethbridge experimental farm shows.

They reach maximum wool production at two years of age, says Dr. S. B. Slen, who examined 1,450 fleeces during the experiment. From the second to fourth year about the same amount of wool is produced, but a decline started in the fifth year and continued through the sixth and seventh years.

The Canadian Corriedale breed showed a significant increase in clean fleece weights in the second year and the decline began in the fifth.

In the second, third and fourth years of the Rambouillet, clean fleece weights averaged 5.31, 5.37 and 5.31 pounds. A gradual decrease occurred after the fourth year, but production was maintained at a higher level than with the Corriedale. The Romnelet breed's wool production followed much the same pattern.



B.C. TOTEM POLE erected in U.K.—British workmen aboard the S.S. Pacific Unity measure a 100-foot long totem pole, a gift from the people of British Columbia to the Queen, before unloading it in London. It is to be erected near Virginia Water. British Columbians sent the pole, weighing between 12 and 13 tons, to mark the centenary of the province. It is designed and carved by Chief Mungo Martin of the Kwakiutl, world's leading craftsman of the ancient art. The pole was cut from a single log, taken from a western red cedar 600 years old from a forest in Queen Charlotte islands, 500 miles north of Vancouver. The totem pole is not of religious significance, but is in the nature of a family tree, embodying legendary family and tribal history.

POTATO CHIPS

Studies have shown that in North America consumption of potato chips amounts to 3.7 pounds per person per year, an amount equal to 15 percent of the continent's total potato crop.

Test Shows How To Seed

OTTAWA—There is no textbook formula for getting fall-seeded cereal crops through the winter undamaged, but tests at Dominion Experimental Farm, Swift Current, Sask., point the way to helpful agronomic practices.

Both winter wheat and rye crops responded favorably to shallow seeding into firm and moist seedbed; to packing of the soil; and to plants entering the winter with root and leaf shoot development, rather than being just emerged or in a too-advanced stage.

The press drill was favored when seeding on summerfallow, and the deep furrow drill on stubble.

GOOD ON SUMMERFALLOW

It was found that both winter wheat and rye usually provide higher yields on summerfallow. At the same time, crops on summerfallow are more subject to winter inury than if sown on unprepared stubble.

Rye, it was determined, is the the hardier of the two cereals and may come through adverse winter conditions with worthwhile stands when wheat would be wiped out.

During the Swift Current tests, wheat survived with reasonable stands in seven out of 12 crop years, compared with ten years for fall rye.
